

# Sexual Reproduction

## WORDS

Two parents  
Offspring  
Some from each parent  
Different looks

## DEFINITION

The production of a new living thing by two parent organisms, with each parent contributing half of the instructions for the traits of the offspring so it has traits from both

## SENTENCE

The offspring looks different from both parents, but resembles both when organisms undergo sexual reproduction.

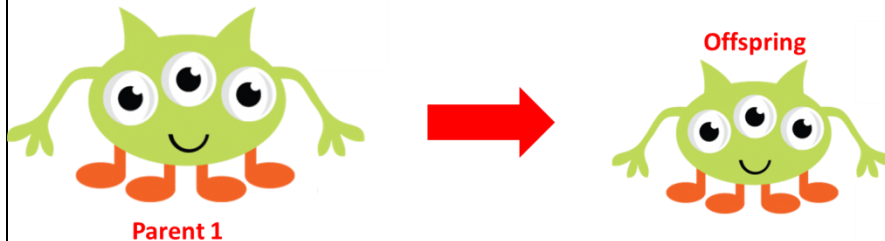

# Asexual Reproduction

## WORDS

One parent  
Offspring  
Same/Identical looks

## DEFINITION

The production of a new living thing by one parent organism, with the offspring having exactly the same traits as the parent

## SENTENCE

The offspring looks exactly like its parent when an organism undergoes asexual reproduction.
